JOURNAL OF ELECTROANALYTICAL CHEMISTRY AND INTERFACIAL ELECTROCHEMISTRY, VOLUME 217 (1987)

SUBJECT INDEX

Alkali metal ions,
surface ion pairing between electrochemically treated glassy carbon and ——— in acetonitrile (Nagaoka et al.) 453

Band microelectrodes,
chronoamperometric current at hemicylinder and ———: theory and experiment (Szabo et al.) 417
Bromide,
structure and composition of the Pt(s) [6(111) × (111)] step-terrace surface vs. pH and potential in aqueous ——— solutions. Studies by LEED and Auger spectroscopy (Baltruschat et al.) 111

Calcium chloride,
characterization of single-crystal electrode surfaces as a function of potential and pH by Auger spectroscopy and LEED. Pt (111) in aqueous ——— and HCl solutions (Stern et al.) 101
Channel electrodes,
hydrodynamic voltammetry at ———. Part IX. Edge effects at rectangular channel flow microelectrodes (Aoki et al.) 33
Chloride,
electrochemical and SEM characterization of Ag electrodes roughened by potential sweep and potential step processes in aqueous ——— and chloride + pyridine media (Pemberton, Girand) 79
Cobalt,
induction of SERS on smooth Ag by the deposition of Ni and ——— (Fleischmann, Tian) 411
Cobalt tetra(*o*-aminophenyl)porphyrin,
electrocatalysis of dioxygen reduction in aqueous acid and base by multimolecular layer films of electropolymerized ——— (Bettelheim et al.) 271
Copper,
electrochemical and SERS investigation of the influence of pH on the effectiveness of some corrosion inhibitors of ——— (Musiani et al.) 187
Corrosion inhibitors,
electrochemical and SERS investigation of the influence of pH on the effectiveness of some ——— of copper (Musiani et al.) 187
Cytochrome c_{551},
direct electrochemistry of bacterial ——— at surface-modified gold electrodes (Hill et al.) 129

Dinitrogen,
the role of ligands in the electrochemical behaviour and catalytic activity of molybdenum-containing catalyst for ——— fixation under mild conditions (Strelets et al.) 425
Dioxygen,
electrocatalysis of ——— reduction in aqueous acid and base by multimolecular layer films of electropolymerized cobalt tetra(*o*-aminophenyl)porphyrin (Bettelheim et al.) 271

Electroactive electropolymerized polymers,
electrode kinetics of ——— deposited on graphite electrode surfaces (Chiba et al.) 239
Electrode reactions,
theory of ——— of redox couples confined to electrode surfaces at monolayer levels. Part II. Cyclic voltammetry and ac impedance measurements (Matsuda et al.) 15
Theory of ——— of redox couples confined to electrode surfaces at monolayer levels. Part I. Expression of the current–potential relationship for simple redox reactions (Matsuda et al.) 1

Glassy carbon,
surface ion pairing between electrochemically treated ——— and alkali metal ions in acetonitrile (Nagaoka et al.) 453
Gold,
direct electrochemistry of bacterial cyto-

chrome c_{551} at surface-modified ——— electrodes (Hill et al.) 129
Extending the metal interface generality of surface-enhanced Raman spectroscopy: underpotential deposited layers of mercury, thallium, and lead on ——— electrodes (Leung, Weaver) 367
Graphite,
electrode kinetics of electroactive electropolymerized polymers deposited on ——— electrode surfaces (Chiba et al.) 239
Metal ions and complexes as modulators of protein–interfacial electron transport at ——— electrodes (Armstrong et al.) 331

Hemicylinder microelectrodes,
chronoamperometric current at ——— and band microelectrodes: theory and experiment (Szabo et al.) 417
Heteropolyacids,
new aspects of the electrochemistry of ———. Part II. Coupled electron and proton transfers in the reduction of silicotungstic species (Keita, Nadjo) 287
Hydrochloric acid,
characterization of single-crystal electrode surfaces as a function of potential and pH by Auger spectroscopy and LEED. Pt (111) in aqueous $CaCl_2$ and ——— solutions (Stern et al.) 101
Hydroquinone,
kinetics of ——— chemisorption at polycrystalline platinum electrodes. The effect of surface roughness (Chia et al.) 121

Immiscible electrolyte interfaces,
salting out of hydrophobic ions at ——— (Geblewicz et al.) 261
Immiscible electrolyte solutions,
investigation of ion transfer across the membrane-stabilized interface of two ——— (Hundhammer et al.) 253
Ion pairing,
surface ——— between electrochemically treated glassy carbon and alkali metal ions in acetonitrile (Nagaoka et al.) 453
Ion transfer,
investigation of ——— across the membrane-stabilized interface of two immiscible electrolyte solutions. Part I (Hundhammer et al.) 253

Lead,
effects of the underpotential and overpotential deposition of ——— and thallium on silver on the Raman spectra of adsorbates (Fleischmann, Tian) 385
Extending the metal interface generality of surface-enhanced Raman spectroscopy: underpotential deposited layers of mercury, thallium, and ——— on gold electrodes (Leung, Weaver) 367
Ligands,
the role of ——— in the electrochemical behaviour and catalytic activity of molybdenum-containing catalyst for dinitrogen fixation under mild conditions (Strelets et al.) 425
Lithium,
improvement of battery performance of ——— batteries assembled with a polypyrrole cathode formed electrochemically with the aid of a nitrile rubber insulating film (Naoi et al.) 203
Lumiflavin,
electrochemical investigation of the redox properties of ——— in acidic media (Reeves, Weiss) 65

Magnetic effects,
investigation of ——— on mass transport at the electrode/electrolyte interface by impedance techniques (Olivier et al.) 443
Mercury,
extending the metal interface generality of surface-enhanced Raman spectroscopy: underpotential deposited layers of ———, thallium, and lead on gold electrodes (Leung, Weaver) 367
Metal ions,
——— and complexes as modulators of protein–interfacial electron transport at graphite electrodes (Armstrong et al.) 331
Microelectrodes,
chronoamperometric current at hemicylinder and band ———: theory and experiment (Szabo et al.) 417
Hydrodynamic voltammetry at channel electrodes. Part IX. Edge effects at rectangular channel flow ——— (Aoki et al.) 33
Molybdenum,
dimerization of electrogenerated ——— (V) in sulphuric acid solutions (Yokoi et al.) 305
The role of ligands in the electrochemical behaviour and catalytic activity of ———-

containing catalyst for dinitrogen fixation under mild conditions (Strelets et al.) 425

Nickel,
induction of SERS on smooth Ag by the deposition of ——— and Co (Fleischmann, Tian) 411
Nitrile rubber,
improvement of battery performance of Li batteries assembled with a polypyrrole cathode formed electrochemically with the aid of a ——— insulating film (Naoi et al.) 203

Palladium,
initial stages of electrooxidation of ——— (100) surfaces in sulfuric acid solution: an XPS study (Solomun) 435
Piezoelectric nucleation mechanism,
——— in electrocrystallization (Barradas, Hollebone) 209
Platinum,
characterization of single-crystal electrode surfaces as a function of potential and pH by Auger spectroscopy and LEED. ——— (111) in aqueous $CaCl_2$ and HCl solutions (Stern et al.) 101
Kinetics of hydroquinone chemisorption at polycrystalline ——— electrodes. The effect of surface roughness (Chia et al.) 121
Structure and composition of the ——— (s) [6(111) × (111)] step-terrace surface vs. pH and potential in aqueous Br^- solutions. Studies by LEED and Auger spectroscopy (Baltruschat et al.) 111
Polymer gel,
charge transfer across a ———/liquid interface. A voltammetric detector for a flow system (Marecek et al.) 213
Polypyrrole,
improvement of battery performance of Li batteries assembled with a ——— cathode formed electrochemically with the aid of a nitrile rubber insulating film (Naoi et al.) 203
Protein,
metal ions and complexes as modulators of ———-interfacial electron transport at graphite electrodes (Armstrong et al.) 331
Pyridine,
electrochemical and SEM characterization of Ag electrodes roughened by potential sweep and potential step processes in aqueous chloride and chloride + ——— media (Pemberton, Girand) 79
Surface enhanced Raman scattering of ——— on Ag electrodes with controlled-rate oxidation–reduction cycles (Cross, Pemberton) 93

Reaction–diffusion models,
electroanalytical investigations. Part VI. The simulation of fast chemical equilibrium reactions in cyclic voltammetric ——— with spline collocation (Hertl, Speiser) 225
Rectangular channel flow microelectrodes,
hydrodynamic voltammetry at channel electrodes. Part IX. Edge effects at ——— (Aoki et al.) 33
Redox couples,
theory of electrode reactions of ——— confined to electrode surfaces at monolayer levels. Part II. Cyclic voltammetry and ac impedance measurements (Matsuda et al.) 15
Theory of electrode reactions of ——— confined to electrode surfaces at monolayer levels. Part I. Expression of the current–potential relationship for simple redox reactions (Matsuda et al.) 1

Salting out,
——— of hydrophobic ions at immiscible electrolyte interfaces (Geblewicz et al.) 261
Silicotungstic species,
new aspects of the electrochemistry of heteropolyacids. Part II. Coupled electron and proton transfers in the reduction of ——— (Keita, Nadjo) 287
Silver,
effects of the underpotential and overpotential deposition of lead and thallium on ——— on the Raman spectra of adsorbates (Fleischmann, Tian) 385
Electrochemical and SEM characterization of ——— electrodes roughened by potential sweep and potential step processes in aqueous chloride and chloride + pyridine media (Pemberton, Girand) 79
Induction of SERS on smooth ——— by the deposition of Ni and Co (Fleischmann, Tian) 411
Raman spectroscopy of adsorbates on thin film electrodes deposited on ——— substrates (Fleischmann et al.) 397

Surface enhanced Raman scattering of pyridine on ——— electrodes with controlled-rate oxidation–reduction cycles (Cross, Pemberton) 93
Site–site interactions,
electrochemistry of tetracyanoquinodimethane polymer-modified electrodes. Effect of polymer film composition on ——— (Karimi, Chambers) 313
Spline collocation,
electroanalytical investigations. Part VI. The simulation of fast chemical equilibrium reactions in cyclic voltammetric reaction–diffusion models with ——— (Hertl, Speiser) 225
Sulphuric acid,
dimerization of electrogenerated Mo(V) in ——— (Yokoi et al.) 305
Initial stages of electrooxidation of Pd (100) surfaces in ——— solution: an XPS study (Solomun) 435

Tetracyanoquinodimethane,
electrochemistry of ——— polymer-modified electrodes. Effect of polymer film composition on site–site interactions (Karimi, Chambers) 313
Thallium,
effects of the underpotential and overpotential deposition of lead and ——— on silver on the Raman spectra of adsorbates (Fleischmann, Tian) 385
Extending the metal interface generality of surface-enhanced Raman spectroscopy: underpotential deposited layers of mercury, ———, and lead on gold electrodes (Leung, Weaver) 367
Thin film electrodes,
Raman spectroscopy of adsorbates on ——— deposited on silver substrates (Fleischmann et al.) 397

Vanadium hexacyanoferrate,
researches on chemically modified electrodes. Part XVI. Electron diffusion coefficient in ——— film (Dong Shaojun, Li Fengbin) 49

Zirconium,
electrochemical and XPS measurements on thin oxide films on ——— (Meisterjahn et al.) 159
